

# PAYSAR

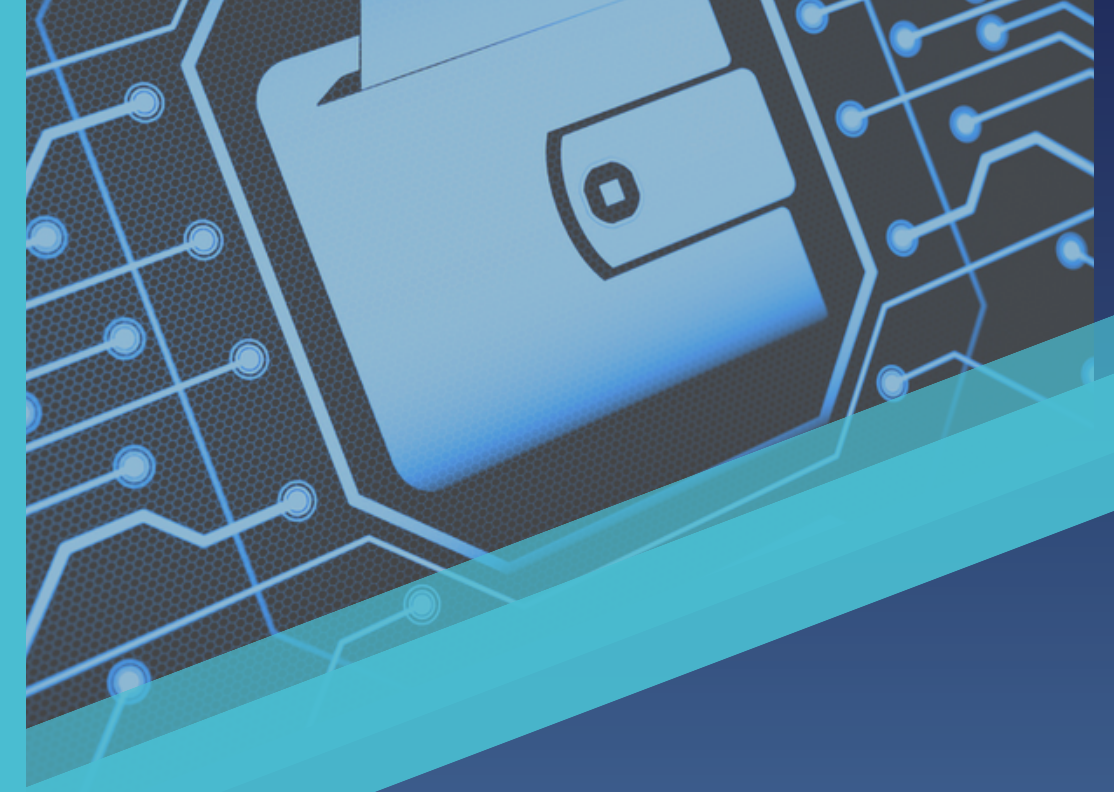

## About us PAYSAR

At the present time, cash transactions are a common feature among international pilgrims traveling to perform Umrah and Hajj, as it is considered a challenge to the complete transformation of banking and digital transactions for Vision 2030. During performing the Hajj and Umrah, the International pilgrims suffer from the following difficulties cash handling ,currency exchange rate and Possibility of losing money. Turning point was formed with the PAYSAR.

## Why PAYSAR

The company aims to launch a digital wallet for users, with focus on the use of modern technologies in artificial intelligence, big data and the protection of user data. PAYSAR will do the following:

- Use of digital and biometric technologies in identification and matching of identity.
- Enabling Blockchain technology for seamless integration between international wallets and banks with PAYSAR.
- PAYSAR is built on microservices technology for fast transactions and minimizing the risk of errors.
- Focus on Mada for the payment's mechanism.
- Using a secure wallet to protect data and financial transactions.
